WORK EXPERIENCE

Back-end Software Engineer

Enium

March 2021 - Present

- Built and maintained integrations with third-party services including Stripe and DocuSign.
- Spearheaded the introduction of unit testing to the back-end application.
- Architected and executed a complete data migration between application versions, ensuring backward compatibility.

Quality Assurance Analyst Intern

1800 Contacts

May 2020 - February 2021

- Rearchitected the E2E testing framework to utilize Cypress over Protractor.
- Ensured top-tier software quality through both manual and automated testing.
- Directed developers towards optimal results by drafting well-defined and scoped acceptance criteria.

Student Web Developer

BYU School of Business

May 2019 - May 2020

- Successfully migrated custom WordPress to Gutenberg blocks.
- Redesigned and transitioned a PHP application used for managing scholarship applications.
- Diligently maintained a vast PHP codebase.

Objective

A dedicated software professional with a track record of successful projects in web development and quality assurance.
